

# NUTRITIONAL SUPPLEMENT

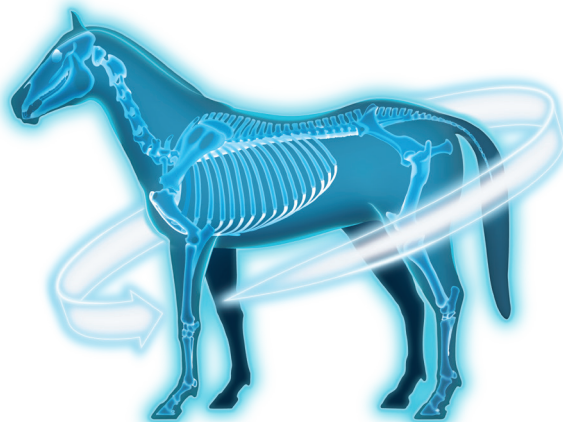

REVERDY VET

## PHYCOCELL

Extract from fresh spirulina\*  
(*Spirulina Platensis*) assayed  
to 3 000 mg /L of phycocyanin.

\*Ingredient from organic farming.

### INDICATIONS

- **Anemia** : helps support the production of red blood cells (hematopoiesis)
- **Hospitalization / Convalescence** : supports the immune system and promotes recovery after surgery
- **Equine Metabolic Syndrome (EMS)** : may improve cellular sensitivity to insulin
- **Athlete Horse** : supports athletic performance, locomotion, and promotes recovery after exertion
- **Leisure / Senior Horse** : helps maintain overall good health (immunity, locomotion, coat condition)

### PACKAGING

20 ampoules  
box

### DIRECTIONS FOR USE

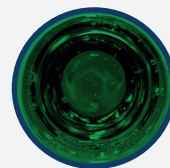

A 20-day cure, with 4 cures per year recommended.

Administer in feed or directly into the mouth.

This supplement is particularly useful in preparation for intense effort (sporting events), during recovery phases, or throughout periods of hospitalization/convalescence.

1 ampoule = 10 ml

HORSE WEIGHT	RECOMMENDED DOSAGE
< 250 kg	10 ml or 1 ampoule /day
> 250 kg	20 ml or 2 ampoules /day

Liquid

\* Free from  
Naturally Occurring  
Prohibited  
Substances (NOPS),  
in accordance with  
the regulations of  
the racing codes,  
FEI, FFE and SHF.

## DETAILED COMPOSITION

Liquid extract of spirulina\* (Spirulina Platensis) standardized to 3000 mg/L of phycocyanin, organic apple flavor\*, malic acid.

*\*Ingredient from organic farming.*

### ANALYTICAL CONSTITUENT

Humidity .....	97%
Total protein .....	1,6%
Crude ash .....	0,25%
Crude fat .....	<0,6%
Crude fiber .....	<0,5%

1 AMPOULE (10 ml)  
OF PHYCOCELL PROVIDES

30 mg of phycocyanine.

## CONSERVATION

- Store in a dry place, away from light, at room temperature.
- Shelf life : 24 months from the date of manufacture.

## PROPERTIES

**Phycocyanin** is spirulina's major active molecule, with many virtues :

- **Immune support** : phycocyanin supports the production of white blood cells. It also increases IgA (immunoglobulin A) antibody production and reduces IgG1 and IgE antibody levels, helping to regulate excessive immune reactions in the event of allergy or infection.
- **Performance support** : in addition to its antioxidant and immunostimulant properties, phycocyanin helps support red blood cell production.
- **Promotes recovery** : as a powerful antioxidant, phycocyanin combats free radicals. Phycocyanine therefore helps horses recover after exercise.
- **Support the locomotor system** : phycocyanin provides antioxidant protection for joints. It helps slow the destruction of joint cartilage.
- **Equine Metabolic Syndrome (EMS)** : phycocyanine supplementation can significantly reduce fasting serum insulin levels.
- **Skin and coat health** : phycocyanin helps maintain healthy skin and improve coat shine.
