

NUTRITIONAL SUPPLEMENT

CARE

- ▶ Combination of **gastric acidity regulators** and **L-glutamine**.
- ▶ Helps **prevent** and **heal stomach ulcers** in horses.

INDICATIONS

- Prevention of gastric ulcers.
- **Reverdy CARE** can be used at increased doses in the following situations:
 - Suspicion of gastric ulcers in stressed horses,
 - Stressful conditions:
 - > Long-term transport,
 - > Intensive training,
 - Known presence of gastric ulcers, in addition to a suitable diet.

PACKAGING

1,5 kg

5 kg

DIRECTIONS FOR USE

Mix well into the ration.
Distribute the daily dose over the different meals..

— 1 measuring cup = 45 g

ADULT HORSE (500 KG)

Preventive dose

1 measuring cup (45 g), or 9 g/100 kg body weight

Maximum recommended dose

2 measuring cups (90 g), or 18 g/100 kg body weight

For ponies and youngstocks, feed a daily dose corresponding to the animal's body weight.

Powder

* Free from Naturally Occurring Prohibited Substances (NOPS), in accordance with the regulations of the racing codes, FEI, FFE and SHF.

DETAILED COMPOSITION

Lithothamnion (*Phymatolithon calcareum*), scFOS (Short-chain Fructo-oligosaccharides), natural green apple flavouring.

PER KILO	
L-glutamine	200,000 mg
Zinc (Sulphate)	4,445 mg

CONSTITUANTS ANALYTIQUES	
Humidity	2%
Total protein	23%
Crude fibre	<0.3%
Crude ash	42%
Calcium	13%
Sodium	0.3%

1 MEASURING CUP (45 G) OF CARE PROVIDES

20,225 mg lithothamnion, 13,000 mg scFOS, 9,000 mg L-glutamine and 200 mg zinc.

CONSERVATION

- Store in a dry place, away from light, at room temperature.
- Shelf life: 24 months from the date of manufacture.

PROPERTIES

Lithothamnion is a calcareous marine algae with a spongy structure called "honeycomb". This particular characteristic explains its high and prolonged buffering capacity in acidic environments. Its interest in neutralizing acid secretions of the stomach has been validated in horses.

scFOS have been shown to decrease the acidity of stomach contents in horses. As prebiotics, they increase the number and activity of lactic acid-utilizing gastric flora.

L-glutamine is an important source of energy for rapidly renewing cells, such as those in the digestive tract. This amino acid therefore helps maintain the integrity of the gastric mucosa and helps heal ulcerative lesions.

Zinc sulphate is thought to participate in the rapid and prolonged inhibition of acid secretions in the stomach.
