- ✓ Soya naturally rich in lysine
- ✓ Optimal doses of vitamins
- ✓ Easily assimilated Trace elements (zinc, copper, selenium)

DIRECTIONS FOR USE

These recommendations are based on the requirements of a 500 kg horse, fed ad-lib quality hay with free access to a pure salt block and clean water.

The amount fed must be precisely adjusted according to:

- Horse body condition, weight and workload;
- Horse stabling and climatic conditions;
- Quantity, quality, and type of forage fed daily.

Split the daily ration into balanced meals.

Precautions for use

Do not distribute rations of oats + RACING BALANCER exceeding 2kg per feed.

SPECIFIC RECOMMENDATIONS

In order to limit the quantity of cereals distributed, it is advisable to add OMEGA OIL oil to the ration.

In sport horses, it is possible to replace part of the oats with barley.
