

ELECTROLYTES POWDER

DESCRIPTION

Mineral salt concentrate that allows the rapid reconstitution of electrolyte stocks lost through sweating.

INDICATIONS

Moderate, intense or prolonged muscular effort leading to sweating.
Transport over long distances.

DIRECTIONS FOR USE

Distribute by mixing with cereals or pelleted feed.
Clean cool water should be made permanently available.
1 measure = 50 g

ADULT HORSE (500 KG)	RECOMMENDED DOSE	WHEN TO ADMINISTER
Moderate effort, transport over long distances	½ to 1 measure (25 to 50 g) equivalent to 5 to 10 g /100 kg (liveweight)	After the event
Intense short effort (racing)	1 to 2 measures (50 to 100 g) equivalent to 10 to 20 g /100 kg (liveweight)	1 measure the evening following the event. Repeat the morning after in the case of heavy sweating.
Prolonged intense effort (endurance)	1 to 2 measures (50 to 100 g) equivalent to 10 to 20 g /100 kg (liveweight)	1 measure morning and/or evening up to 10 days following the event

For ponies, administer a daily dose in proportion to the animal's liveweight.

2.2 kg

7 kg
