

ELECTROLYTES LIQUID

DESCRIPTION

Mineral salt concentrate that allows the rapid reconstitution of electrolyte stocks lost through sweating.

INDICATIONS

Moderate, intense or prolonged muscular effort leading to sweating.
Transport over long distances.

DIRECTIONS FOR USE

Distribute by mixing with the drinking water, cereals or the pelleted feed, or administer directly into the mouth using a syringe.

Clean cool water should be permanently available.

Shake well before use.

1L

5L

| ADULT HORSE (500 KG) | RECOMMENDED DOSE | WHEN TO ADMINISTER |
|---|--|---|
| Moderate efforts, transport over long distances | 50 to 75 ml equivalent to 10 to 15 ml / 100 kg (liveweight) | After the event |
| Intense short efforts (racing) | 75 to 150 ml equivalent to 15 to 30 ml / 100 kg (liveweight) | 75 ml the evening following the event. Repeat the morning after in the case of heavy sweating. |
| Prolonged intense efforts (endurance) | 75 to 150 ml equivalent to 15 to 30 ml / 100 kg (liveweight) | 75 ml morning and evening up to 10 days following the event |

For ponies, administer a daily dose in proportion to the animal's liveweight.

**Free from Naturally Occurring Prohibited Substances (NOPS) in accordance with the regulations of racing codes, FEI, FFE and SHF.*

Liquid

COMPOSITION

Demineralised water, sodium chloride, sodium citrate, potassium chloride, dextrose, magnesium chloride, glycine, orange flavouring.

ANALYTICAL CONSTITUENTS

Humidity.....66%
Total protein.....1.2%
Ash26%
Sodium.....7.7%

50 ML OF ELECTROLYTES GEL PROVIDE

7,945 mg of chloride, 4,635 mg of sodium, 2,100 mg of potassium and 165 mg of magnesium.

PROPERTIES

The ingestion of the mineral salts contained in **ELECTROLYTES LIQUID** allows the rapid reconstitution of electrolyte stocks lost through sweating.

A 50 ml dose compensates for the chloride, sodium, potassium and magnesium losses in approximately 1.5 L of sweat.

Dextrose and glycine facilitate sodium absorption.

PRECAUTIONS FOR USE

During an endurance event, it is possible to distribute **ELECTROLYTES LIQUID** the same day.

However, it must be diluted in a large volume of water and placed at disposition in a container next to the habitual bucket of fresh water.

CONSERVATION

Store in a dry place, away from light, at room temperature.
Shelf life : 24 months.
