

FOAL MILK

BREEDING

DESCRIPTION

Replacement milk, very close in composition to mares' milk, enriched in high nutritional value milk serum proteins, vitamins, and trace elements. Formulated using only "human food" quality milk products. Without palm or copra oils.

INDICATIONS

- Orphan foals
- Foals whose mothers have insufficient milk production

PRESENTATION

10 kg

DIRECTIONS FOR USE

120 g (4 measures) of FOAL MILK per litre of very hot water. Mix vigorously with a whisk in order to obtain a homogeneous mixture. Leave to cool and feed the milk using a feeding bottle, bowl or bucket with a teat.

1 measure = 30 g

Feeding recommendations for a foal whose adult weight will be 500 kg:

AGE, IN DAYS	QUANTITY OF RECONSTITUTED MILK (L/FOAL/DAY)	NUMBER OF RECOMMENDED MEALS PER DAY
1	Colostrum +4 - 5	12 - 24
5	7 - 8	10 - 12
10	10 - 11	8 - 10
15	11 - 12	6 - 8
30	12 - 13	4 - 6
45	13 - 14	4 - 6
60	14 - 15	4 - 6
75	14 - 15	3 - 4
90	14 - 15	3 - 4
110	12 - 13	2 - 3

Simultaneously, from the age of 15 days, we advise introducing the concentrate feed "FOAL". Weaning then can take place around 4 to 5 months old providing that the foal is eating enough "FOAL" (2 kg a day). For ponies and young stock, the daily dose should correspond to the animals' live-weight.

COMPOSITION

Full fat milk powder, lactose, milk serum proteins, magnesium sulphate, sodium bicarbonate, vanilla flavouring, natural tocopherols.

PER KG

Zinc (Sulphate)	60 mg
Copper (Sulphate)	20 mg
Iron (Sulphate)	40 mg
Manganese (Sulphate)	60 mg
Iodine (Calcium iodate)	0.5 mg
Selenium (Selenomethionine)	0.3 mg
Vitamin A	20,000 IU
Vitamin D3	2,500 IU
Vitamin E	300 mg
Vitamin K3	3 mg
Vitamin B1 (Thiamin)	20 mg
Vitamin B2 (Riboflavin)	25 mg
Vitamin B3 (PP or Niacin)	40 mg
Vitamin B5 (Pantothenic acid)	20 mg
Vitamin B6 (Pyridoxine)	15 mg
Vitamin B8 (Biotin)	0.5 mg
Vitamin B9 (Folic acid)	15 mg
Vitamin B12 (Cyanocobalamin)	0.1 mg
Vitamin C (Ascorbic acid)	250 mg

ANALYTICAL CONSTITUENTS

Humidity	3.5 %
Total Protein	19.5 %
Crude Fats	14.5 %
Crude Fibre	0.3 %
Crude Ash	4.5 %
Calcium	0.5 %
Phosphorus	0.4 %
Magnesium	0.2 %
Sodium	0.3 %

PROPERTIES

Milk product based replacement milk, containing levels of serum proteins, casein, fats and oils and lactose that are very close in composition to mares' milk. Enables the daily nutritional requirements of unweaned foals to be met when maternal milk is absent or unavailable in sufficient quantity.

STORAGE

Store in a dry place, away from light, at a temperature of between 5 and 25°C.
