

LITHOTHAMNION

SUPPOSED VIRTUES / TRADITIONAL USES

- Source of assimilable calcium and magnesium, favourable to good bone mineralisation
- High and long lasting buffering capacity, helps neutralise acid secretions in the stomach
- Balances the calcium to phosphorus ratio of cereal-based rations

COMPOSITION

Lithothamnium calcareum
(Corallinaceae), algae (powder).

ANALYTICAL CONSTITUENTS

Moisture < 5%
Ash 95%
Calcium 33%
Magnesium 2.5%

GUARANTEES

No additives.

RECOMMENDATIONS FOR USE:

Introduce gradually into the ration.
Mix well with cereals or pelleted feed.
Distribute twice daily if possible.

Supplied measure: 30 ml

RECOMMENDED DAILY DOSE:	
for 100kg body-weight	5 - 10 g
for a 500kg horse	25 - 50 g ≈ 25 - 50 ml
for a 300kg pony	15 - 30 g ≈ 15 - 30 ml

Length of the cure: can be given
continuously.

Dose to be adjusted according to
the calcium and phosphorus
content of the entire diet (concentrate feed + hay).

Consult your vet for advice.

PRECAUTIONS FOR USE

Product intended for equines.

Respect the instructions for use.

1 kg

CONSERVATION

Store in a dry place, away from
light, at room temperature.

Close properly after use.

Keep out of the reach of children.
